

DEMOCRITUS UNIVERSITY OF THRACE

DEPARTMENT OF MEDICINE

Mission Statement of the School of Medicine

2025

"The mission of Medicine is to train physicians with a high level of scientific knowledge, clinical skills, and professionalism, who are capable of providing quality healthcare services, promoting population health, and contributing to the advancement of medical science. Core values: academic integrity, respect for the patient and their rights, equality and inclusion, social responsibility, and lifelong learning. The mission statement is made public and serves as a guide for the design and revision of the Undergraduate Study Program, as well as for relations with healthcare structures and the local community. The Department of Medicine of the Democritus University of Thrace (DUTH) is committed to providing high-quality education to its students and researchers, and to striving towards the development of a creative environment for work, education, and research. The central goal of the Administration, as well as of the entire human resources of the Department of Medicine—Faculty members (DEP), Laboratory Teaching Staff (EDIP), Special Technical Laboratory Staff (ETEP), Special Teaching Staff (EEP), administrative staff, and associates—is the continuous improvement of its means and infrastructure for the provision of educational services, excellence in education and research, and the production and dissemination of cutting-edge knowledge."
